

CARPET AMERICA RECOVERY EFFORT SM
Developing market-based solutions for the recycling & reuse
of post-consumer carpet

December 8, 2008

Bellbridge Inc.
5401 Industrial Way
Benicia, CA 94510

Dear Mr. Bell:

We write to you to congratulate Bellbridge on your environmental efforts in the area of recycling and reuse of used wool carpets.

We have seen the research work you have recently completed on the Bellbridge website and feel this demonstrates a very interesting use of recycled wool carpets in a visual and beneficial way. The improvement in quality and growth of the plants pictured in the recycled wool lined containers is clearly significant and a good illustration of some the benefits that wool can have in a recycled form.

CARE (Carpet America Recovery Effort) is a joint industry/government effort to increase the amount of recycling and reuse of post consumer carpet and reduce the amount of waste carpet going to landfill. We are greatly encouraged to see your efforts in this regard.

We understand that Bellbridge is continuing to develop recycling options for its wool carpets and we support your initiatives and would thank you for the very positive steps you are taking in the area of reducing the environmental impact of carpets going to landfill.

Sincerely,

Frank Hurd
Carpet America Recovery Effort
Chairman
